

Puesto de trabajo: process operators

(Ref. VDAB: 67004474-65764379)

Nº de puestos: 5

Lugar: Bélgica

Empresa: [Molymet Belgium](#) | [About Molymet](#)

Fecha: 17/08/2023

Información sobre el puesto:

- 2 sulfuric acid process operators Chemically technically trained
- 3 process operators for the PurOx bachelor of chemistry/similar
- As a process operator in the control room, you closely monitor the various operating parameters of the various installations.
- You analyse data and adjust parameters whenever that's necessary.
- You carry out inspection rounds in the department on a regular basis.
- You take samples and analyse them thoroughly.
- As a process operator, you recognise problems in time and take the initiative to solve them.
- Minor maintenance work falls under your responsibility. But if you notice that the problem is bigger than expected, you call in the help of our specialised maintenance team.
- You carry out technical administrative tasks such as drawing up and updating work instructions. You report regularly on production figures, the quality of the production process and technical defects.

Perfil del candidato:

- You have a Bachelor or A2 degree in chemistry or chemical process engineering and can look back on successful experience as a process operator in a chemical production environment.
- Perhaps even more important than your degree are your unbridled motivation to train further as a process operator and your thorough team spirit, which makes you an indispensable colleague.
- You have a strong sense of responsibility and safety is always a top priority for you.
- As a hands-on team player, you are not afraid to roll up your sleeves yourself.

- You fully identify with our core values ROSI: Respect, Open, Together and Initiative.
- A short rotating full-continuous shift system (4-2) suits you down to the ground.

¿Qué te ofrecemos?

- You will be joining a company that is part of an international group that continuously invests in further growth and development, with room for innovation and automation.
- A full-time position in a short-rotation system.
- Unique experience in launching a completely new department.
- A job where you can use your technical expertise day after day within a dynamic and informal working environment, where collegiality and communication are paramount and initiative is encouraged.
- Ample development opportunities and a competitive salary package in line with your experience and commitment, complemented by numerous fringe benefits including 18 compensatory rest days.
- Work schedule: shifts (4/2)
- Leave: 18 annualized ADV days + 20 days statutory leave
- Pay package:
 - Wage code 9 = €24.2172 gross hourly wage = €±4,197.57 gross monthly wage
 - Shift premiums =
Saturday (150%) and Sunday (200%)
Morning and evening shift = € 1.9773 extra per hour
Night shift = €4.9594 extra per hour
- Meal vouchers: €8/day worked
- Hospital and group insurance
