

Aquatic Veterinarian

Number of Posts: 1

Contract Type: Fixed / Definite Contract

Job description:

Charged with managing the health of our research fish stocks, carrying out all necessary necropsies and diagnostics, as well as developing experimental protocols. The candidate would also support and participate in national and international research projects that AquaBioTech Group is involved in.

The duties include, but are not limited to:

- Sampling for routine health monitoring and trial related requirements
- Health management of the fish stock in the facility
- Necropsies and diagnostics required by routine health management of the stock and trial related requirements.
- Carrying out of vaccination and challenges with pathogens.
- Development of Challenge Models and other experimental SOPs
- Writing of study protocols and study reports
- Coordinate and track assignments, schedules and project budgets.
- Other duties as assigned by the company.

Requirements:

The ideal candidate will have a strong balance between academic qualifications and practical experience in microbiology, histopathology and aquaculture. The individual is expected to have a DVM, Doctorate of Veterinarian Medicine. Experience in laboratory operating procedures, GMP for the Batch Release of Aquatic Vaccines and GLP would also be a bonus, but not essential as all training in these procedures will be provided.

Training provided: No

Any assistance with accommodation/relocation: Yes

Any other benefits: We offer Work Permit, Health Insurance, Accommodation

Salary: 29K up to 33K

How will the interviews be held: Online
