

Vacancy

Radioisotope Production Coordinator

Yours Tasks

As part of the ILL's Reactor Division, you will be responsible for coordinating activities linked to the production of radioisotopes, used principally to produce radiopharmaceutical products for cancer treatment. This is a cross-functional position spanning various ILL services. It is a position that will develop as a new dedicated hot cell is being implemented and the production capacity increases.

Your main duties will be to:

- Liaise with the users (international radiochemical laboratories) within the context of irradiating samples at ILL
- Coordinate work by teams from various services
- Organise the preparation of irradiation shuttles
- Monitor orders and subcontracted operations regarding the irradiation shuttles
- Take an active role in the field with the technicians to condition the shipping containers
- Calculate the activation of samples and carry out mandatory periodic tests and inspections linked to the radioisotope production equipment
- Draft various documentation such as procedures, technical specifications, reports, etc.
- Take part in the project for a new hot cell.

Qualifications / Experience:

- You have a Level 7 qualification (Master's degree or equivalent) in nuclear engineering, nuclear physics, radiochemistry, or similar.
- Experience in the production of radioisotopes or in nuclear installations is an advantage.
- You should be organised and methodical in your work and able to work independently, with good writing skills.
- You have a "hands-on" approach to your work and are used to working alone and in a team. You have a strong service-oriented attitude, and are able to take initiative while complying with regulatory requirements.
- You must have a sound knowledge of English and French. Some knowledge of German would be an advantage.

We offer:

- ✓ **Quality of life** A hub for research and technology, the city of Grenoble is ideally located in the heart of the French Alps (just 3 hours from Paris/Provence by train, 1 hour from Lyon international airport and 1 ½ hours from Geneva). It is important for us that our staff achieve a healthy work-life balance. We therefore offer home working (under certain conditions), generous annual paid leave entitlement and a host of other benefits that you will discover when you arrive!
- ✓ **Prospects** We guarantee you a **indefinite-term contract** in a multicultural scientific environment.
- ✓ **Benefits** - We offer generous social benefits (expatriation allowance, excellent health cover), moving and relocation assistance (under certain conditions) and an annual productivity bonus. We also offer language courses for you and your partner and subsidies for the use of public transport and the staff canteen, as well as for holidays and a variety of cultural and sports activities.

How to apply:
