

Cloud & Platform Engineer

One of the 3Shape priorities is to utilize cloud providers for us to deliver services internally as well as externally to our customers. Microsoft Azure is our primary cloud provider, and we are growing our services in Azure. We are using our cloud providers for IaaS, PaaS, and SaaS.

We are looking for a Cloud Engineer who also has operations experience. The position is in a team who is currently involved in DevOps for a number of projects, however it is likely that you will also be part of the Cloud Center of Excellence (CCoE).

The DevOps team is responsible for some central services in the cloud today, and we want to add more DevOps capabilities to support the projects in the department. Together with the rest of 3Shape we will work on setting the standards for DevOps in Azure including guiding the projects to add more focus on Infrastructure as Code, monitoring, and assisting the teams in overseeing the infrastructure.

We are expanding our 24x7 operations function, and you will be key to work together with them making sure that they have the right tools, monitors, scripts for them to monitor and service our systems while we are not at work.

If you think this sounds like a super exciting position, please apply for this job opening.

Key areas of responsibility

Take over management of some services and assist management of other services. This could include

- Provision additional capacity.
- Build and maintain scripts for Infrastructure-as-Code together with the project teams
- Deploy/apply software updates as directed by DevOps
- Assist in troubleshooting QA environments.

Monitor and respond to platform service incidents, e.g. by

- Increase our monitoring capabilities
- Develop log monitors to scan for errors and other anomalies.
- Develop what-if scenarios for the operations team to work from

Work together with support, operations, and development teams to troubleshoot, isolate, and remediate all incidents until resolution.

Perform daily assessment of trend performance data and develop automated detection methods to spot problems.

Understand, implement, and automate security controls, governance processes and compliance validation.

Skills & Requirements

- Min 3 years of cloud DevOps experience from both a developer and operations perspective.
- Experienced with containerized workflows (Azure Kubernetes Services)
- Solid understanding of cloud applications, concepts, storage, compute, networking and database components of Microsoft Azure, as well as monitoring and operations
- Microsoft Azure DevOps
- DevOps mindset

Join us in shaping a company culture that makes Monday mornings worth it.

We are an exciting, visionary, and international place to work. But most of all, we are a diverse group of over 50 different nationalities who all contribute to an awesome company culture. We partake in social clubs, monthly Friday and various in-team activities as well. If that's not enough, then add on:

- An attractive healthcare package to keep you fit and well.
- Breakfast every day, and a delicious and healthy lunch cooked by our private chefs.
- Good work/life balance e.g., work from home policy for up to 2 days per week.
- A joint purpose: to enable dentists to provide superior dental care to every patient, every time.

Staying true to our values and DEI efforts, we encourage all relevant applicants to apply, and we ask you NOT to add any photos or sensitive information (age, marital status, nationality) during the application process.

We encourage all relevant applicants to apply. We are committed to celebrating human diversity, and we trust that the best way to reach outstanding business results, is by welcoming diverse people into our community.

About us

3Shape started with a simple idea - to make 3D scanning better. First, we applied it to the hearing industry, then we succeeded in dentistry. Twenty years later, 3Shape has 2,000+ employees globally. With the help of dental professionals and amazing colleagues we're creating award-winning scanning and CAD/CAM solutions to change dentistry together! Together, we contribute to a better world.
