Database Administrator (DBA) Engineer

We are seeking an experienced Database Administrator to manage, optimize, and secure our organization's database systems in an international, regulated environment.
Place of work: Barcelona (Spain)

KEY RESPONSIBILITIES

- Database Management: Oversee installation, configuration, maintenance, security, and optimization of database systems
- Collaboration: Work with developers, architects, and infrastructure teams to design efficient, normalized database structures
- Performance Tuning: Monitor database performance; optimize queries, indexes, and configurations
- Security: Manage identities, roles, permissions, and implement security policies
- Troubleshooting: Diagnose and resolve database-related issues
- Automation: Develop scripts/tools (Bash, Python, etc.) to automate repetitive tasks
- Capacity Planning: Evaluate and plan for database growth/scalability
- Cross-functional Support: Assist other IT teams as needed
- Documentation: Prepare and maintain technical documentation
- Compliance: Conduct system reviews (GMP systems) and generate reports
- Vendor Coordination: Liaise with application/solution providers

SPECIFIC SKILLS: Database Systems: MySQL, SQL Server, PostgreSQL, etc. Scripting: Bash, Python, PowerShell, or Perl. OS Knowledge: Linux, Unix, Windows. Monitoring Tools: Nagios, Zabbix, Prometheus, or DBMS-specific tools. Backup/Recovery: Data protection strategies and tools - Cloud DBs: AWS RDS, Azure SQL, Google Cloud SQL

LANGUAGES:

Fluent in English and Spanish (written and spoken) – this role operates in an international setting Knowledge of Italian, French or German is a plus.

TRAINING: Preferred: Bachelor's degree or equivalent in Computer Science, Telecommunications, Engineering, or related field

EXPERIENCE: 2-5 years as a DBA administrator.

CONTRACT: Permanent.

SALARY: 40.000€ - 50.000€ gross/annually Commensurate with experience.

WORKING HOURS: 40/week (08:30 to 17:30). Occasional public holiday work as required by client needs. Additional Duties: On-call shifts and travels to other sites (Europe).

OTHER EMPLOYMENT CONDITIONS: Travel-related costs to other sites than primary assigned location will be covered/reimbursed additionally. Additional compensation will be provided for on-call shifts, public holiday work, and overtime hours. Place of work: Barcelona (Spain)
