

## Vacancy

You will join the (7-person) Development team in the ILL's IT Service, where you will contribute to the development, maintenance and continuous improvement of our applications, software and tools and thus support our scientific research activities.

### Full stack developer

#### Yours Tasks

As a key member of the team, you will be responsible for:

- Leading the design and development of applications, tools and software in Java
- Writing general and detailed technical specifications, anticipating potential problems and future upgrades.
- Managing software development tools (gitlab, automated deployment, CI/CD) and authentication protocols (OpenID Connect, SAML, etc.).
- Preparing and performing unit testing and making the necessary corrections following these tests or functional tests performed by users.
- Correcting and optimising functionalities (quality, graphics, ergonomics, etc.).
- Documenting applications for later developments and deployment to production.
- Participating in high-impact projects in collaboration with other large-scale European research institutes.
- Communicating effectively and delivering presentations on technical subjects.
- Monitoring trends in software development.

#### Qualifications / Experience:

- Level 3 to Level 6 qualification in Information Technology (or equivalent), together with significant professional experience in developing applications using Java, NodeJS and Angular.
- Experience in microservices would be appreciated.
- You have a good command of written and spoken English.
- You are flexible and able to respond proactively to the needs of our users whilst respecting development standards.
- You are also versatile and creative when it comes to identifying the right technical solutions.

## We offer:

- ✓ **Quality of life** A hub for research and technology, the city of Grenoble is ideally located in the heart of the French Alps (just 3 hours from Paris/Provence by train, 1 hour from Lyon international airport and 1 ½ hours from Geneva). It is important for us that our staff achieve a healthy work-life balance. We therefore offer home working (under certain conditions), generous annual paid leave entitlement and a host of other benefits that you will discover when you arrive!
- ✓ **Prospects** We guarantee you a **Indefinite-term contract** in a multicultural scientific environment.
- ✓ **Benefits** - We offer generous social benefits (expatriation allowance, excellent health cover), moving and relocation assistance (under certain conditions) and an annual productivity bonus. We also offer language courses for you and your partner and subsidies for the use of public transport and the staff canteen, as well as for holidays and a variety of cultural and sports activities.

## How to apply:

**Please submit your application on line no later 11/12/2022, via our website :**
