

Vacancy

The ILL's Quality, Risk Management and Nuclear Safety Unit (known as the CQSR - Cellule Qualité Sécurité Risques) is a small, dynamic team of five people which reports directly to ILL Management. The core mission of the CQSR is to maintain and improve the ILL's Integrated Management System (IMS), which enables the Institute to comply with regulatory requirements for basic nuclear installations (known as INBs - Installations nucléaires de base). This includes aspects relating to nuclear safety and quality management.

Nuclear safety and quality assurance engineer

Your tasks:

Your main duties will be to:

- Manage the two continuous improvement processes relating to deviation management and experience feedback
- Prepare responses to requests from the French nuclear safety authority (ASN - Autorité de Sécurité Nucléaire) regarding nuclear safety management
- Give an opinion on the nuclear safety documents submitted to the ASN
- Propose solutions to help the other process managers maintain and improve their processes
- Participate in process reviews and in the preparation of the IMS Management Review
- Prepare and conduct internal and external quality audits (including field work) on IMS processes
- Monitor the indicators needed to analyse process performance
- Contribute to the creation of training content and the delivery of training sessions on the IMS and on nuclear safety culture

Your profile:

- Master's degree (or equivalent) in nuclear safety or Master's degree in general engineering with relevant experience in nuclear safety
- 5 years of professional experience is required
- Experience in quality assurance and/or conducting audits would be a plus
- Well-organised and methodical with a responsive attitude; good teamwork skills
- Proficiency in MS Office applications (PowerPoint, Excel, etc.)
- Excellent writing skills in French
- Intermediate level English.

We offer:

Quality of life - A hub for research and technology, the city of Grenoble is ideally located in the heart of the French Alps (just 3 hours from Paris/Provence by train, 1 hour from Lyon international airport and 1 ½ hours from Geneva). It is important for us that our staff achieve a healthy work-life balance. We therefore offer home working (under certain conditions), generous annual paid leave entitlement and a host of other benefits that you will discover when you arrive!

Prospects - We guarantee you a **Indefinite-term contract** in a multicultural scientific environment..

Benefits - We offer generous social benefits (expatriation allowance, excellent health cover), moving and relocation assistance (under certain conditions) and an annual productivity bonus. We also offer language courses for you and your partner and subsidies for the use of public transport and the staff canteen, as well as for holidays and a variety of cultural and sports activities.

How to apply:

Then why not take your next career step with us by sending your application (CV and cover letter) - preferably in English – to the recruitment firm Elatos at the following **email address: g.ricard@elatos.fr** (quoting vacancy **reference 23/40**). Please note that all applicants are subject to administrative screening (background checks) and that medical fitness (including for work under ionising radiation) is required for this position. You will also have to perform an emergency response role in the event of a crisis.

We are committed to equal opportunities and diversity and therefore welcome applications from all suitably qualified candidates.
