NORDREN AS AVD ASKER SØR

Heggedal, Noruega

NordRen AS is committed to contributing to a sustainable future. As one of Norway's leading companies in waste management, we are proud of our environmental focus and our commitment to waste sorting.

In NordRen departement Asker, we have 23 trucks. Some are small Volvo and Iveco single-operator trucks, while the larger ones are Scania three-axle trucks with two-person crews. The trucks have two compartments: One for paper and plastic, one for food and residual waste.

Each two-person crew handles between 300 and 350 stops per day, meaning they empty around 600–700 bins daily. All bins are equipped with RFID chips, which are scanned by antennas on the lifting mechanism during collection. This records the chip number, time of collection, and waste type.

We empty approximately 1.8 million waste containers on an annual basis.

On average, we empty about 7000 - 7500 containers per day, totaling around 36 000 containers per week.

Job description	<ul style="list-style-type: none"> • Collection and transport of household waste on established routes. • Responsibility for the truck, including weekly washing and maintenance according to routines. • Monitoring of waste sorting and discrepancy recording. • Communicating with and guiding customers when necessary. • Other tasks typically associated with the waste collection profession.
