

Maintenance Technician

Are you ready for a new step in your career? Have you been told you always follow a very logic thinking and is meticulous? Do you want to be a part of making the world's greenest battery cells? Then we have the perfect opportunity for you - we are now looking for people who have the right mindset and want to work as a **Maintenance Technician**

About the job

At Northvolt you will be part of a fast-growing company with high-energy and a dynamic environment. As a Maintenance Technician you will work in a top modern facility with innovative technology. So forget about everything you thought you knew about working in the industry, this is going to be completely different. Our production will run 24/7 including weekdays, weekends and all the holidays. The shifts will rotate between morning, evening and nights and we need you to be able to rotate between all the shifts.

You will work in close collaboration with other maintenance colleagues, operators, shift leaders, quality and environment personnel. You will be part of a team where each and everyone counts to make this a success. You will get the chance to really make an impact and be part of shaping our way of working in the future. We work hard to create a good work environment, to make room for creativity, initiatives for improvement and a possibility for people to grow. The Maintenance Technician is a vital member of the Maintenance team and key to Northvolt's mission to enable the future of energy.

Skills & Requirements

- Minimum 3 years of previous experience in maintenance or production
- Have great English written and oral skills
- The willingness to learn
- Elementary computer literacy (Word, PowerPoint, Excel)
