

Mechanical Technical Advisor

We are by workshops at all times. We are their technological partner to help them.

**Face new technological challenges successfully
Make their operations and business much more efficient and profitable
Strengthen their future in the sector**

In Grup Eina we create a value chain for our customers. We become their competitive advantage, their market leverage. We reinforce their marketing and sales, as well as their loyalty strategy. Together we make a difference and accompany workshops at all times

Our team is made up of professionals and experts in various areas

Technical engineers, trainers, consultants, vehicle repair experts, technical editors, computer engineers, system administrators, web and desktop application developers, layout designers, graphic designers, data managers, marketing and sales experts, etc

We work together to offer innovative services and products in the motor industry, focusing our efforts on the professionals of the automotive workshops. For this, we have experts in all disciplines. Our team is characterised by self-determination, companionship and the pursuit of excellence

If you are a proactive person, with initiative and experience in the workshop, able to face new challenges, and you wish to be part of a recognized team of technicians, we offer you the possibility to join us immediately, with an open-ended contract

KEY RESPONSIBILITIES

- Manage and analyse incoming requests from multi-make workshops, which can range from component location, type of lubricants, assembly and disassembly procedures, wiring diagrams... to breakdowns that can only be resolved by in-depth diagnosis
- Send diagnostic and repair information and procedures and give advice to workshops as requested
- Consult Grup Eina's specific databases and manufacturers' technical information portals to search for relevant information
- Make daily and weekly activity reports

ESSENTIAL REQUIREMENTS

- Be a qualified automotive mechanic or technician with at least 5 years of workshop experience
- Be competent in vehicle systems, new integrated technologies, and diagnostic and repair procedure
