

Data Analyst (Part time 20 h/week)

Number of Positions: 1

Contract Type: Indefinite

Job description

- **Data Collection and Preparation:** You will collect data from various internal and external sources and prepare it for analysis, ensuring data quality and consistency.
- **Data Analysis and Interpretation:** Using statistical methods and techniques, you will identify trends, patterns, and relationships in our data. You will utilize tools and programming languages such as Python, R, and SQL.
- **Visualization and Presentation:** You will create insightful reports and dashboards that clearly and understandably present our business results and trends, using visualization tools like Tableau or Power BI.
- **Supporting Data-Driven Decisions:** You will work closely with various departments to identify business problems and develop data-driven solutions. Your analyses will support strategic decisions at all company levels.
- **Continuous Improvement:** You will monitor data quality and continuously implement improvements in our data analysis processes to increase efficiency and accuracy.

Requirements

- ✓ Completed studies in a relevant field (e.g., Business Informatics, Statistics, Mathematics, Computer Science) or comparable qualifications
- ✓ Solid knowledge of data analysis and visualization
- ✓ Experience with programming languages and tools such as Python, R, SQL, Tableau, and/or Power BI
- ✓ Strong analytical skills and a solid understanding of statistical methods
- ✓ Ability to translate complex data into understandable and actionable information
- ✓ Independent, structured, and solution-oriented working style
- ✓ Strong communication skills and team spirit

Training provided

We expect knowledge in this field, of course, provide all data/information as needed. Not training itself, as this is a new position in our company and we need your expertise.
