

ENGINEER - WELCOME TO SWEDEN!

- **Eures Engineering** is a team within the Swedish Public Employment Services.
- Our focus is guiding engineers within EU/EEA who wants to start up a new life working in Sweden.
- Our mission is to assist Swedish industries and companies to find you, and for you to find them.
- We provide you with information about how to find suitable job offers and companies. Give information about the application process, follow your process, and answer your questions.

We are especially looking for Engineers within:

Chemistry - Electronics - Infrastructure & Construction - Mechanics - Mining - Renewable energy & Environment. We are also interested in other Engineers and Technicians.

Sweden has an innovative and sustainable industrial production at the forefront of development. There is a need for engineers all over Sweden, especially in the North, where you find numerous large development industrial projects, with the highest ambition and focus on production lines with zero climate impact.

Take the opportunity to broaden your life experience and let us guide you towards an Engineering job in Sweden today!
