ONE RAMS TECHNICIAN SPECIALISED IN THE RAILWAY SECTOR (Spain – Madrid)

COMPANY:

We are a consolidated engineering and consulting company at a European level that provides engineering services (civil, electronic, mechanic among others) and Information Technology & Telecommunications. Although our projects are developed in five continents, we have physical offices in Madrid, Barcelona and Bilbao.

One of our strengths is the diversification: we are able to offer solutions adapted to the different sectors: Transport, Energy, Industrial sector, Pharmaceutical or the sector of Information Technologies among others.

For Exceltic excellence means continuous improvement, flexibility, adaptability and customer orientation, allowing the construction of lasting relationships based on trust and transparency.

We need a RAMS Technician specialised in the railway sector for one of our clients.

RESPONSABILITIES

Your responsibilities will focus on:

- Generating and reviewing all safety documentation for railway projects at both national and international levels.
- Obtaining railway accreditations. Creating procedures and obtaining internal resources aimed at achieving these certifications.
- Organizing the technical aspects of various safety-related events with participants from administration, certifiers, technologists, etc.
- Assisting in the technical drafting of proposals.
- Undertaking training courses in railway safety.
- Recommending processes and improvements, such as adopting tools to enhance Exceltic's efficiency, both in obtaining certifications and in other areas, document management, versioning, configuration management, project lifecycle, etc.

REQUIREMENTS

- Engineering studies. Specially:
 - RAMS (Railway)
 - Civiles,
 - Industriales,
 - Electrónicos,
 - Mecánicos,
 - Informáticos,
 - Telecomunicaciones
