INTEGRATION DEVELOPER ADMINISTRATOR
Valencia, Spain

Position description

The purpose of the post is to provide IT application integration support to ADB (Asian Development Bank) and to ensure that applications deployed to production are designed, documented, and implemented in accordance with industry standards and ADB standards. The selected candidate will work in close collaboration with the ADB IT teams in Manila, Philippines.

Main duties and responsibilities

The incumbent will work under the direct supervision and guidance of the Head, Customer IT Resilience Team (OPBR) and Chief, Business Solutions Solutions Section (OPB) within the Operations Division (OP) and in close collaboration with the ADB IT technical teams. The incumbent could be requested to do any others tasks of similar level in related fields.

Experience and skills required

Essential:
- At least eight (8) years of relevant hands-on experience in IT Application Integration Support
- In-depht experience in API design and development
- Solid understanding of integration design patterns (e.g., event-driven architecture and cloud-native/hybrid cloud solutions)
- Must be familiar with Internet protocols and standards (e.g., IETF), and their practical uses
- Substantial experience on automation tools and configuration as code (e.g., Bash, Ansible, Terraform, Azure DevOps)
- Experience in a DevOps workplace culture that practice containerization and CICD
- Relevant experience in programming thin and thick applications or other equivalent enterprise-grade language
- Good foundation in networking, operating systems, and Java Virtual Machine concepts
- Successful completion of secondary school education supplemented by specialized training in IT
- English expert knowledge is required

Desirable:
- Work experience and knowledge in: Integration/entreprise service bus products: software AG webMethods or equivalent
- Databases: Oracle, Microsoft SQL Server or equivalent
- CI/CD: Jenkins, Azure DevOps or equivalent
- Front-end development is a plus (e.g. HTML, Javascript, Angular)
- Excellent documentation skills to create and maintain technical procedures and best practices
- Knowledge/certification in Windows and/or Linux
- Familiarity with ITIL best practices
- Knowledge of Spanish is an advantage

Compensation:

- Salary: EUR 44,839 (annual, net of tax at single rate)
- Contract: fixed term
- Hours a day: 7,5
UNICC also offers generous leave and absence allowances, flexible working hours, overtime compensation, teleworking, access to training, and depending on eligibility other benefits such as relocation grant, dependency allowance, language allowance, or education grant.
