# Frontend Developer, Odense Denmark

Coalescent Mobile Robotics ApS, Odense, Denmark, is looking for a Frontend Developer.

This is a full-time position, to start as soon as possible. Salary and warrants to be negotiated based on experience.

Who we are

Our company is building fleets of mobile robots to automate transportation of goods within supermarkets. Our robots help the staff with their daily jobs of filling orders, going to shelves to collect products, and bringing them to the final customers. You will have the unique opportunity to work with a skilled cross-functional development team in key company projects such as autonomous navigation in densely populated store areas, fleet management orchestration, and precision driving.

What we're looking for

We are looking for a Front End Developer. As our FED you will play a key role in designing and building our customer focused dashboards and apps to make our customers' life easier. You will also focus on developing the overall infrastructure for automated software testing, building, and deployment.

Your key responsibilities would be:

- Contributing to the design and implementation of user-facing and internal applications
- Helping to define and develop the tools and systems we use to build applications
- Developing interactive UI components for managing data and systems
- Building with accessibility, compatibility, and performance in mind
- Design and documentation of systems incorporating customer and team feedback
- Helping to build the front-end function and skills within the organization
- Use markup languages like HTML/HTML5 to create user-friendly web pages
- Proficiency with css/css3
- Optimize applications for maximum speed
- Design mobile-based features
- Collaborate with back-end, angular developers, and web designers to improve usability
- Write functional requirement documents and guides
- Help developers with front-end requirements and troubleshooting
- Ensure high quality graphic standards and brand consistency
- Stay up to date on emerging technologies

Skills

- Web: Javascript, Typescript, React, Jest, Webpack, experience with common browsers and mobile OS's (Firefox, Chrome, Android, IOS). Knowledge of current security and authentication practices.

Benefits

- Flexible hours
- A great international working environment
- Team-building activities
