PHP Developer

Number of Posts: 1
Contract Type: Permanent – Full Time

At River, we develop innovative products for our clients who operate in different markets and industries with the latest technologies. We are looking for a PHP Developer to join our team. Could this be your next career challenge?

The chosen candidate will be part of the Software Engineering department which is responsible for delivering innovative software solutions in an agile environment to fulfil the company vision.

Responsibilities
• Build reusable code and libraries for future use
• Implementation of efficient and performant backend code
• Provide realistic estimates for requests, fixes and new ideas
• Cooperate with the multiple teams in implementing new functionality
• Ability to look at a problem and come up with practical solutions
• Write unit tests with mocked code
• Write clear and precise technical documentation

Skills And Experience Required
• Able to plan and work autonomously and within a team
• Understanding of Agile methodology
• Deep understanding of source control and GIT Flow.
• Experience with JIRA is helpful.
• Experience with multi-threading and concurrency.
• Experience with debugging, performance profiling and optimisation.
• Experience with microservices would be considered an asset.
• Experience with client/server
• Comprehensive understanding of object-oriented and service-oriented application development
• Bachelor's degree in information technology, computer science, computer information systems, management information systems, or related field will be considered an asset.
• A record of successful delivery of software solutions as an individual.
• Strong understanding of the software development cycle
• Strong development, time management, and problem solving skills
• Experience with Scrum methodology and Agile practices.

Skills
• PHP 7+
• Doctrine 2+
• Symfony 4.4+
• Codeception
• Can run and maintain Docker in project
• Be well-versed in REST fundamentals and API design best practices
