

Aquaculture Consultant

Number of Posts: 1

Contract Type: definite

A multi-functional role that requires a variety of tasks to be undertaken as and when work arises. The post holder will be required to coordinate and report on various aquatic / aquaculture related projects and initiatives from a range of public and private client base. Such projects will include but aren't limited to development initiatives, feasibility assessments and market research and production viability assessments. The candidate should be fluent in written and spoken English and ideally at least one other language. The candidate would also need to hold a clean driving licence..

NOTE: All applicants must have an EU/EEA/UK passport OR be a third-country national (TCN) presently residing in the EU with the required permits and have an excellent command of the English language, written and spoken

Job description:

A position within AquaBioTech Group has arisen for a suitably qualified person to work on a variety of projects within the Group's diverse portfolio. The post advertised is for the position of Senior Aquaculture Consultant, ideally, but not essential, with knowledge of recirculation aquaculture system (RAS) technologies.

The responsibilities of the selected candidate are to be divided into three distinct areas of work, although briefly described as undertaking the development and management of various projects and assignments that are contracted to AquaBioTech Group.

- The primary task is to provide assistance in the undertaking of a range of consultancy assignments (project planning, technical and financial feasibility studies, risk assessments, due diligence reviews, market research intelligence, as well as technical and operational support) for a variety of global aquaculture projects. Such projects will require knowledge of a range of fish species, shrimp and shellfish. Additional system knowledge on hatcheries, nurseries, growout projects in cages, ponds and recirculation aquaculture systems (RAS) will be essential.. It would be desirable for the candidate to have practical experience for provision of training and commissioning activities for both remote and on-site working.
- The secondary task is to assist our design and engineering teams with the required biological / technical input relating to bio-planning, stocking, growth-curves and feeding rates with regards to research facilities, broodstock, hatchery, nursery and grow-out recirculation aquaculture systems. Assist the engineering and architectural teams with the preparation of bill of quantities for projects.
- The last task area is to assist the installation teams with the implementation of the projects and post commission phases. This part of the work can take the selected candidate to a variety of locations all over the world for various durations of time. For some of the larger projects we are involved in there will be the opportunity to relocate for a substantial period of time - assistance with the relocation process will be provided in these cases.

Reporting directly to the Senior Aquaculture Consultant, the position is demanding requiring a person who is highly motivated and self-organised. The selected person must be prepared to work to very tight deadlines in isolated and multi-functional projects and in conjunction with a team of international staff based at our head-office based in Malta.

The post holder will be expected to travel internationally and may be expected to be on site in situ with the client for prolonged periods of time.

Requirements:

A successful candidate is expected to have at least a M.Sc. in Aquaculture, Fisheries, Oceanography or a related scientific field. Experienced based candidates (3-5 years) are also encouraged to apply. The selected candidate will have to speak and write English fluently. Knowledge of any another language (such as French) will be considered an asset, but not essential. The selected candidate must have a clean EU/EEA/UK passport OR be a third-country national (TCN) presently residing in the EU with no travel restrictions, no legal convictions held at any time and be in possession of a clean driving licence..

Training provided: Successful candidates will go through our internal onboarding procedure, whereas all information and documentation will be provided before start date, for information and signing

Any assistance with accommodation/relocation

AquaBioTech Group offers all employees company accommodation, which comes at cheaper rates compared to personal renting, and which will be available immediately for new employees to use upon their arrival. All preparation related to accommodation is handled by the company.

Salary : €20K - €35K per year.

The successful candidate will be offered a long-term, fixed-term contract with the company. The starting package offered for this position will be structured largely upon the chosen candidate, reflecting the experience the candidate brings to the company, but also in line with the cost of living in Malta and could include an accommodation package, if required.

How will the interviews be held: Both online and in-person interviews will be held, depending on the location of the individual.
